Wadsworth, Illinois 60083

## NOTICE

### INFORMATIONAL OPEN HOUSE MEETING for the WADSWORTH OAKS DRAINAGE IMPROVEMENTS

**Monday, November 14, 2022  
4 PM - 7 PM**

**WADSWORTH VILLAGE HALL  
14155 W. Wadsworth Rd  
Wadsworth, IL 60083**

Dear Resident,

The Village of Wadsworth will conduct an Informational Open House Meeting to provide residents information and the opportunity to ask questions and/or provide their feedback regarding the planned roadway and drainage improvements within the Wadsworth Oaks Subdivision. The informational meeting will be held in the Board Room of the Village Hall on November 14, 2022 from 4:00 PM to 7:00 PM. All persons interested in this project are invited to attend this meeting. The Village will make a short presentation to provide a general overview of the project. The overview will be presented at both 4:30 and 6:00 to those in attendance (the same information will be presented at each time).

The remainder of the meeting will be conducted on an informal open house basis. Representatives of the Village of Wadsworth and their engineering consultant, Baxter and Woodman, Inc., will be available to discuss the project and will answer individual questions and record comments offered by those in attendance. The meeting will address topics such as the need for the project, the scope of work planned, and the tentative construction schedule.

Preliminary engineering plans and exhibits will be available for inspection and viewing during the entire open house meeting. The same material is currently available for inspection and viewing at the Wadsworth Village Hall during normal business hours (9:00 AM to 3:00 PM). Comments or questions may be submitted at the meeting, before the meeting, or after the meeting (see contact information below).

The proposed drainage improvements will include re-grading existing ditches and the addition of stormwater underdrains in ditch areas to improve existing stormwater conditions. The project will also include construction of new storm sewers and the replacement of driveway culverts where those improvements have been determined necessary to improve existing stormwater conditions. The project will not negatively impact any downstream areas and all existing outfalls will be maintained and preserved as part of the project.

The future planned work will also include rehabilitation of the existing asphalt roadway pavement under a separate contract, after the drainage improvements have been completed.

For more information, or to provide comments before or after the meeting, please contact Mr. Pat DiPersio, Village Administrator, at 847-336-7771, or by email at [info@villageofwadsworth.org](mailto:info@villageofwadsworth.org)
